To view our complete product line visit: www.woodfordmfg.com or email: sales@woodfordmfg.com

- The Woodford MB65 & MB67 are freezeless commercial wall hydrants housed in a secure light weight, high impact, composite box with a replaceable stainless steel door and fascia assembly.
- Hydrants drain as handle is shut off, *even if hose is attached.*
- The Modular Box system is designed to securely contain the MB65 or MB67 wall hydrant in freezing climate area commercial buildings.
- Stub-out the composite box from a frame or masonry wall.
- After the wall is finished, screw the heavy 14 gauge stainless steel door and fascia assembly into the box to create a durable, secure access and an attractive front.
- *MB65 & MB67 Series hydrants are intended for irrigation purposes in freezing climate areas. Not for continuous use.*
