

Freezeless Roof Hydrant Model RHY1

The Woodford RHY1 provides water availability for window washing, cleaning of condenser coils, cooling towers and other types of roof equipment. Valve body of hydrant is drilled and tapped with 1/8" drain hole which must be piped to a drain location.

The RHY1 allows for installation flexibility since it is not necessary to install hydrant when hydrant support is mounted to the roof. The hydrant support utilizes a 3" opening that allows the hydrant to be installed later if desired. All necessary mounting hardware for proper installation on a commercial roof is supplied, including a 2 degree shim for pitch adjustment.

Hydrant Features:

- **Rod Guide** - Eliminates side pull on rod, reduces wear on packing, packing nut & stem.
- **Adjustable Link** - Provides easy and positive adjustment of the lever lock tension.
- **One Piece Variable Flow Plunger** - Large cushion type seal for longer life-is not easily damaged and assures shut-off even when foreign particles are present.
- **Maintenance & Repair** - All repairs can be made from top of unit without removing hydrant. Parts are readily available.

Specifications:

- 1" NPT Female inlet
- 3/4" Brass hose nozzle
 - *Optional at Additional Cost: 1" brass hose nozzle*
