

NO COLD-WEATHER WOES...EVEN WITH A HOSE.

**THE WOODFORD MODEL 30
WALL FAUCET
FREEZELESS
AUTOMATIC DRAINING.
DUAL CHECK BACKFLOW
PREVENTION.**

Designed for residential and light commercial applications, the Woodford Model 30 will not freeze, even with a hose attached.

It drains automatically and our ASSE 1052 listed backflow preventer is field testable, holds against 125 p.s.i. pressure, and features dual check valves. In fact, the Model 30 is so distinctive, a patent is pending on its design.

No lead solder is used, and the Model 30 includes Woodford quality at no extra charge.

For anyone who has inadvertently left a hose attached to an ordinary outside faucet and paid the price, the model 30 is a bargain indeed.

**Optional Woodford
Adjustable Mounting Sleeve**

Takes the guesswork out of how far to stub-out Woodford freezeless faucets through brick, stone, or stucco veneers. Also provides a secure, precise anchor for the faucet.

Also available as the Model 30CC,
for use in non-freezing climates.
