

*This unit offers NO anti-siphon protection.*

The Woodford Model 16 contains an internal resetting pressure relief valve which prevents the faucet casing tube from bursting in freezing conditions even if a hose is unintentionally left on.

This faucet is intended for irrigation purposes and designed for residential outside water service application and is not intended for continuous use applications.

#### SPECIFICATIONS:

- Manufactured under one or more of the following patents:  
For Patent Information see:  
<https://www.Woodfordmfg.com/Patents>

#### FEATURES:

- *Patented resetting pressure relief valve prevents the faucet casing tube from bursting in freezing conditions even if a hose is unintentionally left on.*

- 3/4" male hose thread nozzle
- Stainless steel seat - eliminates wire draw
- EPDM packing to prevent leaking
- Full circle operating threads on valve body and retainer
- No-lead solder
- Standard "O" size seat washer
- Oval, powder-coated, die cast aluminum handle
- Optional Tee Key available (extra charge)
- Adjustable polycarbonate wall flange
- **MAX PRESSURE** - 125 p.s.i.
- **MAX TEMPERATURE** - 120° F

#### INSTALLATION REQUIREMENTS:

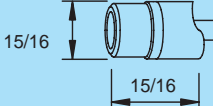

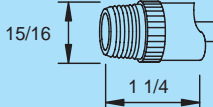

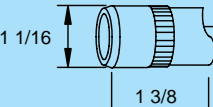

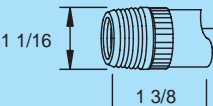

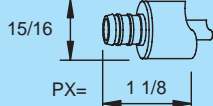

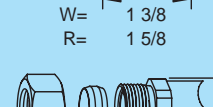

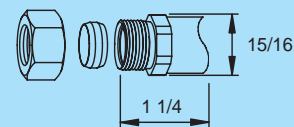

- The faucet length used is to be comparable to what would be used with standard freezeless faucets.
- The inlet connection must be located in a heated area.
- The gap between the house and faucet must be sealed to prevent air leaks.
- The faucet must be installed with a slight downward pitch toward the nozzle.
- Adequate insulation is required around the faucet, wall board and sill plate.
